

SCIENCE WRITING TEMPLATE

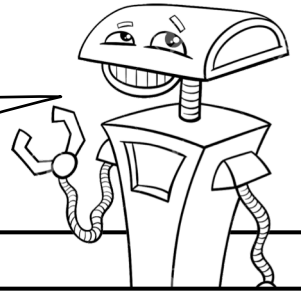

Name:

Date:

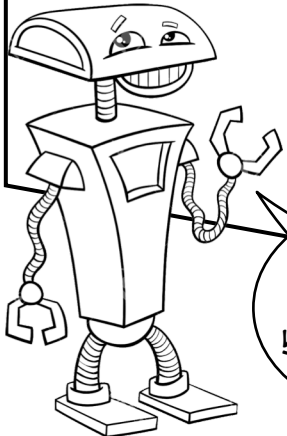

My beginning thoughts...

My testable question...

TIP: Could a Friend design an investigation based on reading your question?

My experiment plan...

TIP: Think about how to organize your experiment...

What variables will remain the same?
What variables will change?

How will you measure results?

Could a Friend read your plan and repeat your experiment?

My experiment results...

TIP: Try to use words, photos or drawings, and numbers to record your results.

Large empty rectangular box for recording experiment results.

Empty rectangular box for recording experiment results.

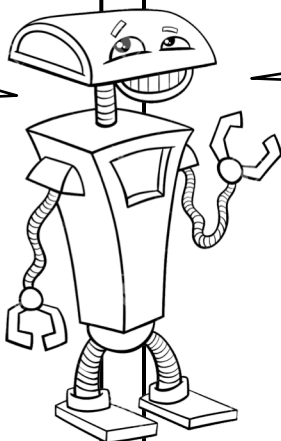

Empty rectangular box for recording experiment results.

My claim...

TIP: After doing your experiment, what big science idea can you say is true?

My evidence...

TIP: How do the results of your experiment tell you that your claim is true?

Now I think...

TIP: Now that you've done your experiment, what else do you wonder about?

How did the information in the background reading fit in with what happened in your experiment?

What new testable questions could you follow up with?
