

Cartoons for the Classroom

Presented by NIEonline.com and the Association of American Editorial Cartoonists (AAEC)

Climate warnings grow more dire

By John Darkow / Courtesy of cagle.com

Talking points

1. How does John Darkow's cartoon tie the latest UN climate report to something in current popular culture?
2. How does John Cole's cartoon portray people who deny climate change?
3. The UN report warns that climate change could increase the danger of war. How would that happen?
4. The report also urges governments to prepare to deal with expected impacts of climate change. How could we cope with falling food production and rising seas?

Between the lines

"Nobody on this planet is going to be untouched by the impacts of climate change."

- Rajendra Pachauri, UN Intergovernmental Panel on Climate Change .
