The only two features available in this view are to **zoom in** or **zoom out** .

Reading in Index Mode

The second way to view the newspaper is in the **Index** view:

- Click **Index**
- Click an article on the **left**, and it will appear on the **right**.
- Above the article, a **menu** will appear with various functions available: (from left to right) translation drop down menu, view previous article, go back to index, view next article, listen to the article being read out loud, print or share the article, change the display from text to graphic, increase or decrease the size of the text.

Final points

Using the newspaper

The newspaper is an important form of informational text. It is both a primary and secondary source, which can be used in all subjects and grade levels. If you are planning to encourage students to use the digital edition at home, make sure the number of licenses requested reflects the anticipated student numbers. The number of licenses ordered (plus print copies) cannot exceed the number of students you teach though.
